

Extent of realized geological works:

- exploratory non-equipped boreholes (Geoprobe probes) - 6 pcs
- equipped monitoring boreholes - 7 pcs
- short-term hydrodynamic test
- sampling work and field measurements
- laboratory work
- drawing up a final report with a risk analysis
- drawing up a feasibility study of remediation

Customer:

Ministry of Environment of the Slovak Republic
Námestie Ľ. Štúra 1
812 35 Bratislava

Contractor of geological works:

ENVIGEO, Inc.
Kynceľová 2
974 11 Banská Bystrica

Geological Survey Results:

- no pesticide contamination of soil, groundwater or building structures has been detected
- the presence of nitrites (NO_2^-) and mercury (Hg) in groundwater has been confirmed
- the risk analysis did not show the presence of environmental risk in a similar way as it did not proven presence of health risk
- a feasibility study of the remediation proposed a complex of suitable remediation methods for nitrites and Hg in groundwater in case of its use

Budget of the geological task: **29 000 €** (excluding VAT)

Solution time: **jan 29, 2014 - apr 29, 2015** (15 months)
